Shalima Khanum

T: 07874637631   **E**: SHALIMA.KHANUM@GMAIL.COM   **W**: https://shalimakhanum.github.io/

GITHUB: https://github.com/ShalimaKhanum

Profile	A proactive worker who thrives at challenging levels with experiences of many coding languages: • Highly proficient in **JavaScript**, **HTML**, **CSS** • Intermediate **python** (independent learning through research and beginner Harvard courses) • Skilled in **Visual Studio Code**, a tool used for building my projects and websites • Proficient in **bootstrap**, **Linux**, **GitHub**

Education

Mulberry School for Girls Sixth Form	A Levels - Economics (**B**), Maths (**C**), Psychology (**B**)	**2017 – 2020**
Mulberry School for Girls	GCSEs – Maths (**8**), English (**9**), Science (**A***), other (**4 A*s, 3 As, B**)	**2012 – 2017**

Experience

Accenture – Tech Taster Week   **March 2021**
- Educated me on technological advancements (e.g. quantum computing, cyber-security, AI and chatbots)
- Designed & presented an interactive app to tackle the prevailing issue of financial illiteracy for young people
- Creatively designing in a flat environment produced an equally inputted product app

Generation UK – Software Engineering Tech Talent Accelerator Bootcamp   **Sept 2020 – Nov 2020**
- Learned and utilised programming languages – **HTML, CSS, JavaScript**
- Intensive research skills gained from usage of DOM manipulation, event listeners, local storage API and JavaScript OOP classes
- Adept in **Visual Studio Code** and **Linux virtual machine**, demonstrated expertise in utilising tools for projects
- Leading roles in group work whilst coding a group website
- Proficient in **bootstrap, Linux, GitHub**
- Communicated and networked through **Slack** with teammates

KNChildcare – Admin assistant   **May 2019 – Aug 2019**
- Organisation skills - used computer software to create spreadsheets, compose messages, manage databases, and produce reports, and other documents

EY Foundation – Intern   **Aug 2018**
Experiences of shadowing staff members and a Dragons Den project which I gained many skills from, for example:
- Leadership skills – designed a mobile that performs quantum computing, assigned roles to each team member
- Teamwork skills – identified the strengths of my peers and implement them into our presentation inclusively
- Presentation + communication skills – presented the winning detailed product design and a feasible financial plan

Atkins – Pathways to Engineering programme   **Oct 2017 – Apr 2018**
6-month programme of workshops and tasks to engineer and design manufacturing of a sustainable airport model:
- Planning and research skills – created a portfolio, financial breakdown of the expenses and extensively researched unique ways of implementing sustainability
- Management skills - assigned roles, ensured everyone was contributing equally, developed ideas and led our team to present our plans and as a team, we successfully won the challenge overall

Projects
- **Personal portfolio website** - https://shalimakhanum.github.io/, applied HTML, CSS & bootstrap components to build a site of my achievements and abilities, exhibiting my projects below
- **Group website** – used HTML, CSS & bootstrap components & combined my teams' pages to build a cohesive site
- **Task planner application** – demonstrates usage of DOM manipulation, event listeners, local storage API & JavaScript OOP classes, which allows the user to add and delete tasks simultaneously to 2 lists and through extensive research of DOM manipulation, my application updates the task planner data without needing a refresh

Skills
- Proficient in Microsoft including MS word and MS excel
- Languages – Bengali (Fluent orally and written skills), English (Fluent orally and written skills)
